

Charlie

Roder - 1, Charlie

new ul - friend of d's partner.
guy dementia, not cop.

went to see her to see what could be
done. Looks of problems. kept
going to see her + problem solving
issues. going to Angel for
heather, getting across national,
trying, anything, organic food.

- copy up to know.
can't sustain.

got respite hel.
isolated.

didn't respite hel.

did as up in MHA + detention

took her in as due to transport error.

ended up getting into placement.

another example of keeping people together

focus on keeping together in own home

2a - Chris - capacity, choice, risks, why today
not yesterday. how did we

experience of previous cases - similarities (even though
different)

2b -
availability of colleagues for support/advice
aware of what can be up.
clarifying views.

- not like that everywhere.

2c - wide picture
social perspective
other options / services - answers
anything we can do.
purpose of hospital
do no harm - recognize how to improve

3. Coping centered, in relation to how living.
legal frameworks.
risk factors.
anything to prevent need.

4. other teams should not give up too early.
previous experience re: suicides - influence decisions -
risk assessment.
Good plan to make sure for person
get all resources, need to make assessment
of risk.
