

When I felt most

- ① Most confident about criteria, supported by team & seniors. United front. Team approach - when patient at centre. Triage.  
 JC - ~~the~~ said no, then home visit - Ax not require.

LC -

- Team approach.

- ② (a) Humour -  
~~Decisiveness~~ Decisiveness, no fall  
 - Positive risk taking  
 - Confidence

(b) Supportive team, always on it by someone  
 feeling safe & supported - respectful of alt. views.

(c) Think holistically, more about social issues.  
 look at pt lives in broader way, around their diagnosis

- ③ Consider impact of MHAAs - Supportive team  
 Outcome unknown, no agenda. - Analytical people.  
 Patient @ centre of plans  
 weighing up of risks.  
 Use of self Value autonomy.

- Better services readily available
- Better staffed practice ward for assessment when  
 Able to focus on one request at a s2.  
 time
