

16/11/2020 Our Bive Uqul MTC ^{in room}.

F late 30's, lives 14 yr old son.

Village.

Bel's boiler pois her keeps ringing fire brig.

S136 - agr NWIS.

At home same \Rightarrow A+E.

200mg Queti brother insis take it, doesn't think need it. Worr too much meds. (Taking 8x25mg)

Psychosis following birth of son.

Home life daily feel can't continue

- Dr Keur's - not a anti-psyc dose. Hadn't seen her.

54mp Carbon monox poisoning - headache.

Anx.

Dizziness.

Checked out Phy e.g brain tumour. Bloods - hormones.

Kept checking family day + night. All converged at mum's.

She didn't want hosp. Not about her the boiler.

- Safer envir - Psyc A+E / cafe
- Issues re meds.
- Explore boiler. Get it serviced.
- Add support to her at home but also for family.
- Bloods, Phy check.

Themes Exploring antecedents.

Earlier Invol AMHP Team. ^{C.C stays} Involved. ^{keyworker} Continuity.

Practical Intervention as approp.

Diff support network. or re. Intra band 4's.

Multi-discip crisis team incl reviewing treatment.

Clarify re risks. Clear, accurate information.

1:40.
